

## Output:

```
/tmp/30wYQAgie4.o
```

```
Enter any sentence of your choice:
```

```
it must be one of the choice to be rendered in front of others
```

```
Your Resultant and Modified Sentence is:
```

```
it must
```

```
be one
```

```
of the
```

```
choice to
```

```
be rendered
```

```
in front
```

```
of others
```

```
Total number of lines taken to print your sentence is:7
```

```
/tmp/30NP3VITIO.o
```

```
Enter any string:
```

```
It requires Order(n) complexity to traverse Singly Linked List
```

```
Resultant Modified String is:
```

```
It requires
```

```
Order(n) complexity
```

```
to traverse
```

```
Singly Linked
```

```
List
```

```
Total number of lines is:5
```

```
Enter the paragraph
```

```
what if there is a function going on
```

```
the paragraph is
```

```
what if
```

```
there is
```

```
a function
```

```
going on
```

```
the number of lines is 4
```

```
/tmp/30NP3VITIO.o
```

```
Enter the paragraph
```

```
it should be something
```

```
the paragraph is
```

```
it should
```

```
be something
```

```
the number of lines is 2
```
